

Here is the complete project documentation rewritten with an improved narrative style while maintaining all original sections, technical specifications, data models, workflows, testing metrics, and project planning details.

Student Enrollment & Course Management System (SECMS)

Executive Overview

The Student Enrollment & Course Management System (SECMS) is an enterprise Salesforce application engineered to digitize, automate, and centralize the end-to-end academic operations of an educational institution. By consolidating disparate administrative workflows into a unified Salesforce environment, the platform empowers administrators, enrollment officers, and academic staff to manage student lifecycles, course catalogs, class enrollments, faculty allocations, tuition processing, and operational reporting seamlessly.

1. INTRODUCTION

1.1 Project Overview

The primary goal of SECMS is to establish a single source of truth for all student data, course offerings, and registration records across the institution. By moving away from fragmented, legacy tracking methods, the platform

establishes structured workflows that provide complete transparency into enrollment pipelines, staff allocations, and student academic progression.

The platform leverages native Salesforce platform capabilities—including Record-Triggered Flows, Multi-Step Approval Processes, Custom Validation Logic, dynamic Page Layouts, and real-time Reports and Dashboards. These components work in tandem to eliminate manual intervention, enforce data integrity, and provide real-time visibility into key performance indicators (KPIs) such as enrollment counts, institutional revenue, active student distributions, and operational bottlenecks.

1.2 Purpose

SECMS replaces manual, paper-based, and disconnected tracking routines with a scalable, cloud-based solution engineered to ensure:

- * **Data Integrity:** Standardized student, faculty, and course record management.

- * **Workflow Automation:** Streamlined registration, tracking, and approval operations.

- * **Governance & Validation:** Automated business rule enforcement prior to record commitment.

- * **Executive Visibility:** Live tracking of institutional performance and revenue metrics.

2. IDEATION & EMPATHY PHASE

2.1 Problem Statements

The current operational framework suffers from process fragmentation, leading to administrative inefficiency and delayed strategic decision-making.

Problem ID	Stakeholder Persona	Goal / Intent	Operational Obstacle	Root Cause	Impact & Sentiment
------------	---------------------	---------------	----------------------	------------	--------------------

---	---	---	---	---	---
-----	-----	-----	-----	-----	-----

PS-1	**Enrollment Officer**	Efficiently manage student applications and registrations.			
-----------------	-------------------------------	--	--	--	--

Information is fragmented across disparate spreadsheets and emails.

Reliance on unintegrated, manual operational systems.

High frustration due to error-prone data entry and delays.
--

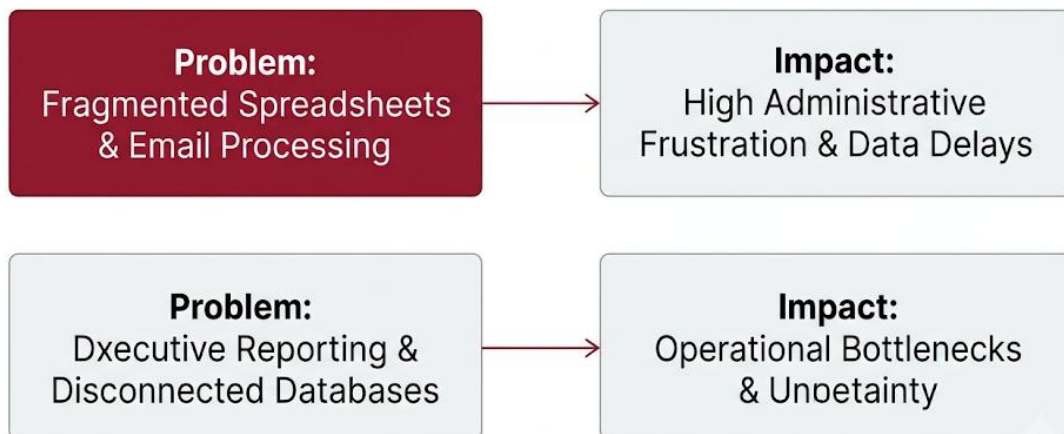

--

PS-2	**Administrator**	Track real-time course enrollment numbers and revenue generation.			
-----------------	--------------------------	---	--	--	--

| Operational reporting and financial summaries are delayed.

| Data is stored in disconnected, non-centralized databases.

| Uncertainty during strategic planning and resource allocation.

2.2 Empathy Map Canvas: Enrollment Officer

* **Think & Feel:** Expresses concern over double-booking courses and missed fee collections. Anxious about approval delays impacting registration deadlines.

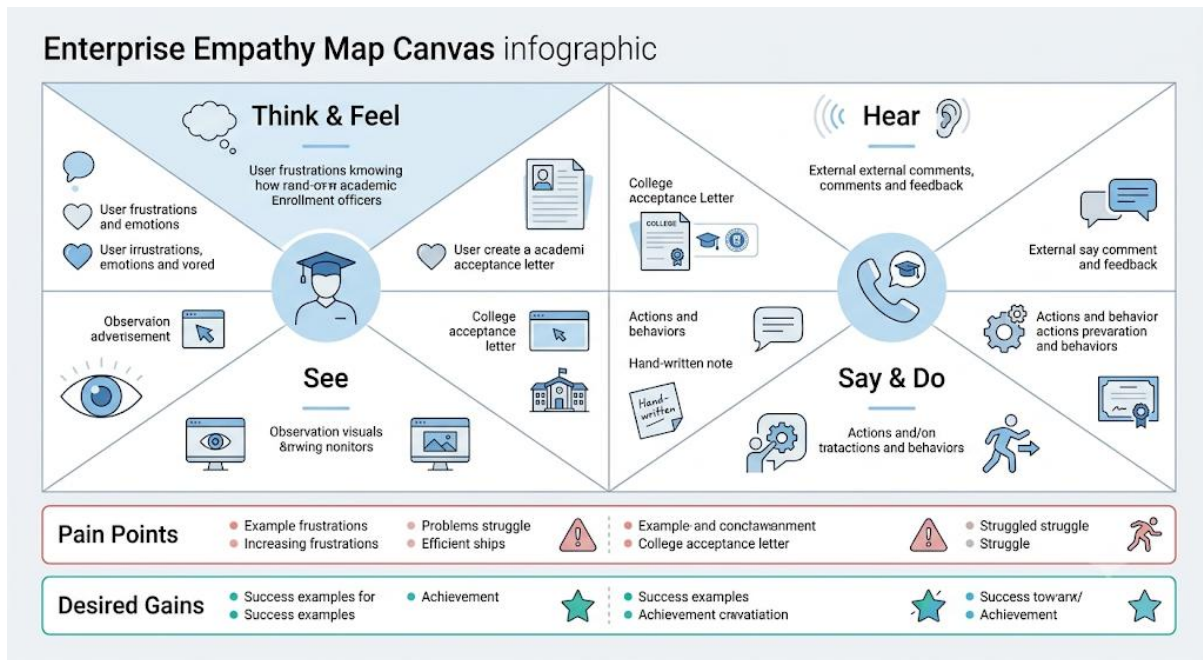

* **Hear:** Frequently receives complaints from students regarding registration delays and feedback from management demanding faster turnaround times.

* **See:** Manages multiple static spreadsheets, heavily flooded email inboxes, and manual cross-checking lists.

* **Say & Do:** Manually validates student records across lists, manually follows up with approvers via email, and double-checks payment receipts.

* **Pain Points:** Duplicate record creation, manual input errors, delayed approval turnarounds.

* **Desired Gains:** Automated record generation, centralized operational dashboards, faster turnaround times.

2.3 Brainstorming & Idea Prioritization

Step 1: Brainstormed Concepts

1. ****Spreadsheet Automation:**** Implementing advanced macro-enabled spreadsheets.
2. ****Standalone Web Portal:**** Developing a custom, independent web portal.
3. ****ERP Integration:**** Connecting legacy databases to an enterprise ERP system.

4. **Salesforce Cloud Platform (SECMS):** Configuring a native Salesforce solution utilizing declarative automation.

Step 2: Categorization

* **Manual Solutions:** Spreadsheet automation.

* **Semi-Automated Solutions:** Standalone enrollment portal, custom ERP integration.

* **Fully Automated Cloud Solutions:** Native Salesforce-based SECMS deployment.

Step 3: Prioritization Matrix Evaluation

The **Salesforce-based SECMS** was chosen as the target solution because it offers high business impact and technical feasibility out-of-the-box via native low-code automation and security controls.

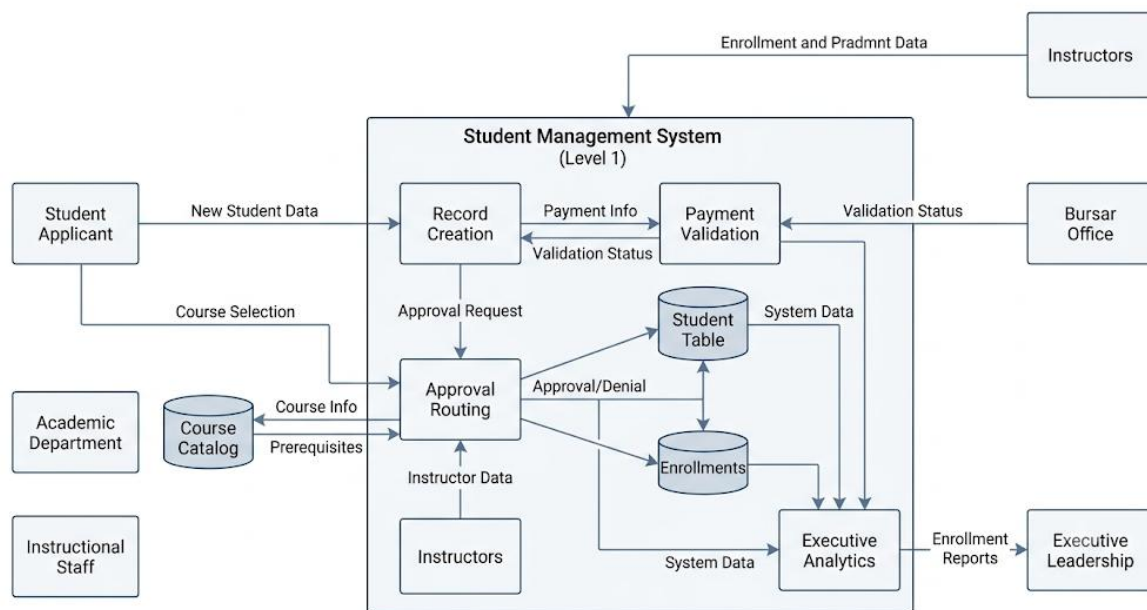

3. ARCHITECTURE & SYSTEM DESIGN

3.1 Customer Journey Map

The lifecycle of a student enrollment inside SECMS progresses across seven defined stages:

1. ****Awareness & Student Registration:**** Prospective student profiles are created.
2. ****Course Selection:**** Students/Officers identify target courses based on availability.
3. ****Enrollment Request:**** An enrollment record is created in 'Requested' status.
4. ****Fee Payment:**** Tuition payment is validated and confirmed.
5. ****Approval Routing:**** Automated routing to the Training Manager for verification.
6. ****Instructor Allocation:**** Automated instructor assignment based on subject domain.

7. ****Reporting & Course Completion:**** Progress is tracked on live dashboards through final course completion.

3.2 Solution Requirements

Functional Requirements

* ****FR-1 (Student Management):**** Store and manage comprehensive student demographic and contact data.

* **FR-2 (Course Management):** Catalog academic offerings, pricing structure, duration, and subject categories.

* **FR-3 (Enrollment Processing):** Facilitate, validate, approve, or reject student enrollment submissions.

* **FR-4 (Instructor Assignment):** Automatically assign eligible faculty members based on course domain.

* **FR-5 (Analytics & Reporting):** Generate real-time reports and visual executive dashboards.

Non-Functional Requirements

* **NFR-1 (Usability):** Intuitive Lightning user interface with single-click actions and role-tailored record layouts.

* **NFR-2 (Security):** Strict role-based access control (RBAC), field-level security, and organizational sharing rules.

* **NFR-3 (Reliability):** Automated validation checks to prevent duplicate registrations and illegal status transitions.

* **NFR-4 (Performance):** Instantaneous dashboard re-renders and sub-second execution of background automation flows.

* **NFR-5 (Scalability):** Multi-departmental architecture capable of expanding to support additional faculties, campuses, and portals.

* **NFR-6 (Availability):** High availability with 24/7 cloud availability and automatic operational data backups.

3.3 System Data Flow

[Record Storage: SECMS Database Objects]

(Student, Course, Enrollment, Instructor)

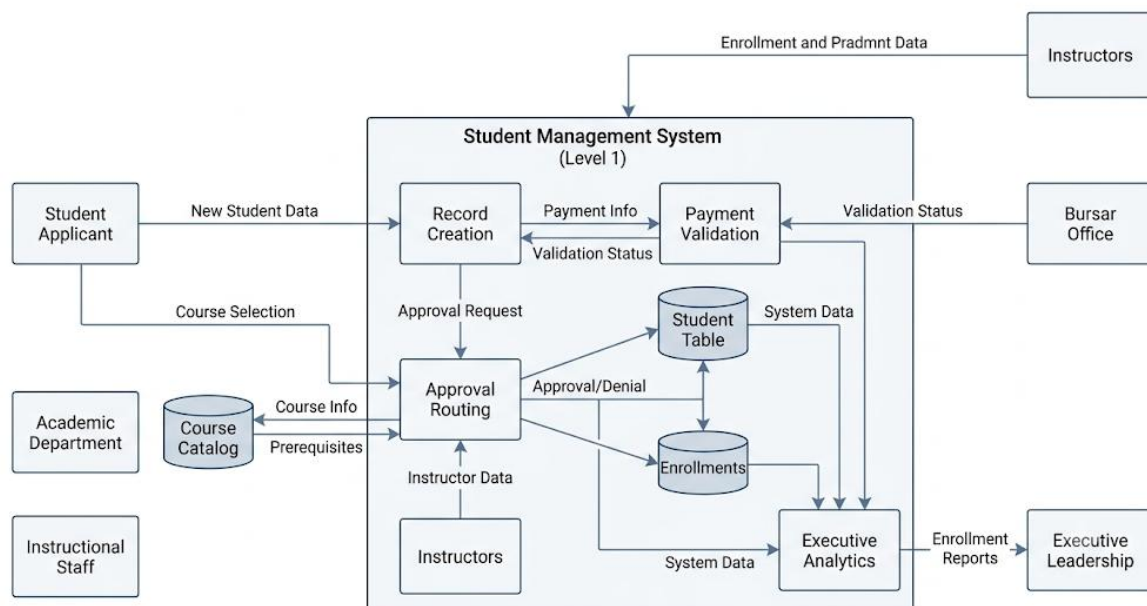

[Triggered Flows & Approvals] [Security & Sharing Engine]

[Reports & Executive Dashboards]

```[cite: 1]

### ### 3.4 Technology Stack

\* \*\*User Interface:\*\* Salesforce Lightning Experience, Custom Lightning Apps[cite: 1].

\* \*\*Business Logic:\*\* Record-Triggered Flows, Custom Validation Rules[cite: 1].

\* \*\*Process Automation:\*\* Standard Salesforce Approval Processes, Automated Email Alerts[cite: 1].

\* \*\*Data Storage:\*\* Custom Salesforce Objects (`Student\_\_c`, `Course\_\_c`, `Instructor\_\_c`, `Enrollment\_\_c`)[cite: 1].

\* \*\*Analytics Layer:\*\* Native Salesforce Reports & Lightning Dashboards[cite: 1].

---

## ## 4. PROJECT DESIGN PHASE

### ### 4.1 Problem-Solution Mapping

| Operational Challenge | SECMS Platform Solution |

| :--- | :--- |

| \*\*Fragmented Spreadsheets\*\* | Centralized Salesforce Database with relational data integrity[cite: 1]. |

| \*\*Manual Paperwork & Processing\*\* | Automated Record-Triggered Flows and standard field updates[cite: 1]. |

| \*\*Delayed Approval Turnarounds\*\* | Single-click, multi-stage automated Approval Processes[cite: 1]. |

| \*\*Scattered Operational Systems\*\* | Unified Lightning Application containing consolidated tabs and dashboards[cite: 1]. |

---

### ### 4.2 Value Proposition & Model

\* \*\*Core Solution:\*\* Native Salesforce SECMS Application[cite: 1].

\* \*\*Innovation:\*\* End-to-end automation of admissions, assignment, and status transitions[cite: 1].

\* \*\*Social Impact:\*\* Enhanced student experience via clear process transparency and instant notifications[cite: 1].

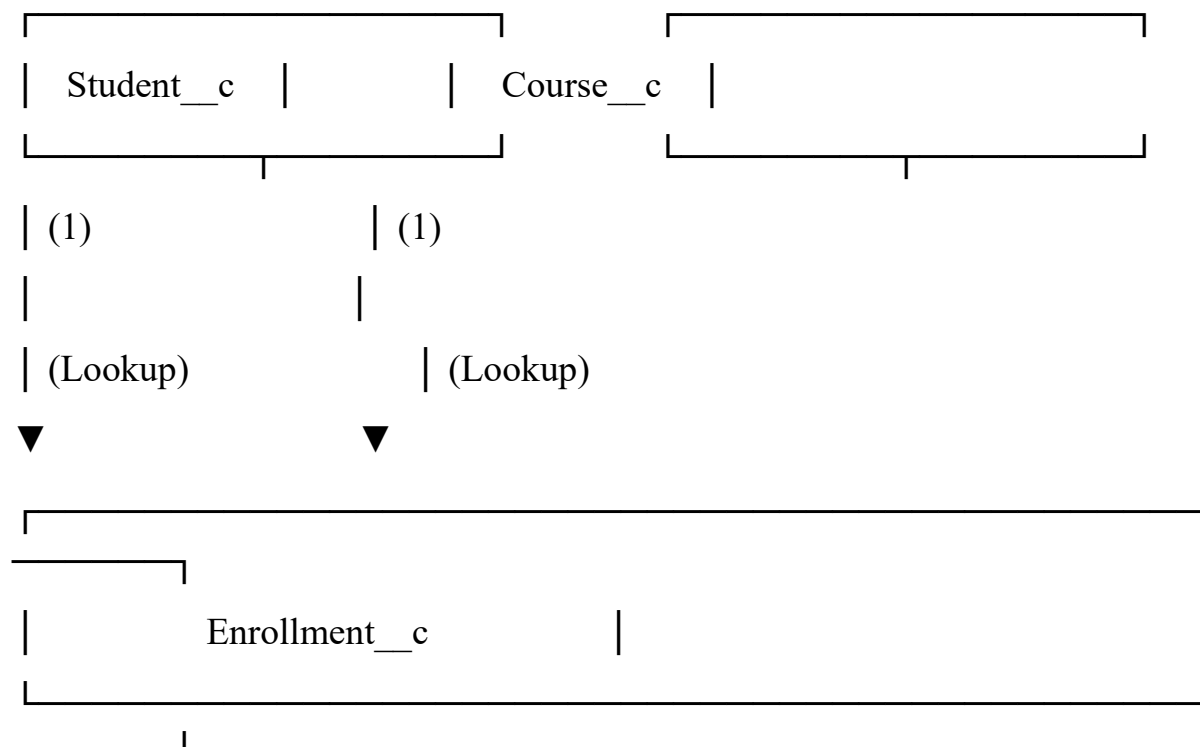

\* \*\*Delivery Model:\*\* Institutional deployment scalable across departments[cite: 1].

\* \*\*Scalability:\*\* Built on Salesforce Multi-Tenant Cloud Architecture[cite: 1].

---

### ### 4.3 Data Model Architecture

5. PROJECT PLANNING & AGILE IMPLEMENTATION

5.1 Sprint Backlog & Work Estimation

| Sprint | Epic / Feature | Story ID | User Story Description | Story Points | Priority | Assignee |
|--------|----------------|----------|------------------------|--------------|----------|----------|
|--------|----------------|----------|------------------------|--------------|----------|----------|

| | | | | | | |
|------|------|------|------|------|------|------|
| :--- | :--- | :--- | :--- | :--- | :--- | :--- |
|------|------|------|------|------|------|------|

| | | | | | | |
|--------------|-----------------|---------|--|---|------|-------------------|
| **Sprint 1** | Developer Setup | `USN-1` | As an admin, I want to provision a Salesforce Developer environment to build and deploy the SECMS solution.[cite: 1] | 1 | High | Member 1[cite: 1] |
|--------------|-----------------|---------|--|---|------|-------------------|

| | | | | | | |
|--------------|---------------|---------|---|---|------|-------------------|
| **Sprint 1** | Data Modeling | `USN-2` | As an admin, I want to create custom objects (`Student`, `Course`, `Instructor`, `Enrollment`) to establish the core data model.[cite: 1] | 3 | High | Member 2[cite: 1] |
|--------------|---------------|---------|---|---|------|-------------------|

| | | | | | | |
|--------------|---------------|---------|--|---|------|-------------------|
| **Sprint 2** | UI Navigation | `USN-3` | As a user, I want custom navigation tabs for all primary objects to easily navigate the system.[cite: 1] | 3 | High | Member 3[cite: 1] |
|--------------|---------------|---------|--|---|------|-------------------|

| **Sprint 2** | Data Modeling | 'USN-4' | As an admin, I want to create custom fields across all objects to capture academic and operational information.[cite: 1] | 5 | High | Member 4[cite: 1] |

| **Sprint 2** | UI Customization | 'USN-5' | As an enrollment officer, I want a dedicated Lightning App to access all administrative tools from one central workspace.[cite: 1] | 3 | High | Member 4[cite: 1] |

| **Sprint 2** | Relational Model | 'USN-6' | As an admin, I want to construct Lookup relationships between objects to logically connect academic data.[cite: 1] | 5 | Medium | Member 1[cite: 1] |

| **Sprint 2** | Layout Design | 'USN-7' | As a user, I want tailored Page Layouts to organize fields clearly and streamline record entry.[cite: 1] | 3 | High | Member 2 |

| **Sprint 3** | Validation Logic | 'USN-8' | As a system, I want validation rules to enforce data integrity and block incomplete or invalid records.[cite: 1] | 3 | High | Member 4[cite: 1] |

| **Sprint 3** | Automation | 'USN-9' | As a system, I want automated flows to populate default dates and trigger emails upon status changes.[cite: 1] | 3 | High | Member 4[cite: 1] |

| **Sprint 3** | Approvals | 'USN-10' | As an admin, I want an approval workflow for enrollment applications to ensure formal manager sign-off.[cite: 1] | 5 | High | Member 1[cite: 1] |

| **Sprint 4** | Platform Security | 'USN-11' | As an admin, I want to configure profiles, permission sets, and OWD sharing to enforce data governance.[cite: 1] | 5 | High | Member 2[cite: 1] |

| **Sprint 5** | Reporting | 'USN-12' | As a manager, I want reports on enrollment trends and fee payments to monitor operational performance.[cite: 1] | 4 | High | Member 3[cite: 1] |

| **Sprint 6** | Executive UI | 'USN-13' | As an executive, I want interactive dashboards to visualize key performance metrics at a glance.[cite: 1] | 4 | Medium | Member 4[cite: 1] |

5.2 Project Tracker & Execution Metrics

| Sprint | Planned Story Points | Duration | Planned Start | Planned End | Completed Points | Actual Release Date | Status |
|--------------|----------------------|----------|---------------|-------------|------------------|---------------------|--------------------|
| :--- | :---: | :---: | :---: | :---: | :---: | :---: | :--- |
| **Sprint 1** | 20 | 6 Days | 24 Oct 2022 | 29 Oct 2022 | 20 | 29 Oct 2022 | Completed[cite: 1] |
| **Sprint 2** | 20 | 6 Days | 31 Oct 2022 | 05 Nov 2022 | 20 | 05 Nov 2022 | Completed[cite: 1] |
| **Sprint 3** | 20 | 6 Days | 07 Nov 2022 | 12 Nov 2022 | 20 | 12 Nov 2022 | Completed[cite: 1] |
| **Sprint 4** | 20 | 6 Days | 14 Nov 2022 | 19 Nov 2022 | 20 | 19 Nov 2022 | Completed[cite: 1] |

6. PROJECT IMPLEMENTATION & TECHNICAL BUILD

Milestone 1: Environment Provisioning

- * Access the developer registration portal ([\[https://developer.salesforce.com/signup\]](https://developer.salesforce.com/signup))(<https://developer.salesforce.com/signup>))[cite: 1].
- * Complete user details, specifying `Developer` role and institutional organization details[cite: 1].
- * Complete account verification via email link and configure administrative credentials[cite: 1].

Milestone 2: Object Creation & Schema Definition

`Student\_\_c` Custom Object

* **Label:** `Student` | **Plural Label:** `Students` | **Object Name:** `Student`[cite: 1]

* **Record Name:** `Student Name` (Data Type: Text)[cite: 1]

* **Optional Features:** Allow Reports, Allow Activities, Track Field History[cite: 1].

* **Search Status:** Allow Search[cite: 1].

(Repeat process for `Course\_\_c`, `Instructor\_\_c`, and `Enrollment\_\_c` custom objects).[cite: 1]

Milestone 3: Custom Field Configurations

1. Student Object Fields (`Student\_\_c`)

* `Student Name`: Text (Standard Name Field)[cite: 1]

* `Email\_\_c`: Email (Required)[cite: 1]

* `Phone\_\_c`: Phone[cite: 1]

* `Date\_of\_Birth\_\_c`: Date[cite: 1]

* `Student\_Status\_\_c`: Picklist (`Prospect`, `Active`, `Inactive`, `Graduated`)[cite: 1]

* `Address\_\_c`: Text Area[cite: 1]

2. Course Object Fields (`Course\_\_c`)

- * `Course Name`: Text (Standard Name Field)[cite: 1]
- * `Category\_\_c`: Picklist (`Technical`, `Language`, `Non-Technical`)[cite: 1]
- * `Duration\_\_c`: Number / Text[cite: 1]
- * `Course\_Fee\_\_c`: Currency (16, 2)[cite: 1]
- * `Description\_\_c`: Text Area[cite: 1]

3. Instructor Object Fields (`Instructor\_\_c`)

- * `Instructor Name`: Text (Standard Name Field)[cite: 1]
- * `Instructor\_Code\_\_c`: Text (Unique)[cite: 1]
- * `Email\_\_c`: Email[cite: 1]

4. Enrollment Object Fields (`Enrollment\_\_c`)

- * `Student\_\_c`: Lookup Relationship (`Student\_\_c`)[cite: 1]
- * `Course\_\_c`: Lookup Relationship (`Course\_\_c`)[cite: 1]
- * `Instructor\_\_c`: Lookup Relationship (`Instructor\_\_c`)[cite: 1]
- * `Enrollment\_Date\_\_c`: Date[cite: 1]
- * `Enrollment\_Status\_\_c`: Picklist (`Requested`, `Approved`, `Rejected`, `Completed`)[cite: 1]
- * `Fees\_Paid\_\_c`: Checkbox (Default: `FALSE`)[cite: 1]
- * `Total\_Amount\_\_c`: Currency (16, 2)[cite: 1]
- * `Comments\_\_c`: Text Area[cite: 1]

Milestone 4: Entity Relationships

1. ****Enrollment to Student:**** Lookup Relationship from `Enrollment\_\_c` targeting `Student\_\_c`[cite: 1].
2. ****Enrollment to Course:**** Lookup Relationship from `Enrollment\_\_c` targeting `Course\_\_c`[cite: 1].
3. ****Enrollment to Instructor:**** Lookup Relationship from `Enrollment\_\_c` targeting `Instructor\_\_c`[cite: 1].

Milestone 5: Custom Validation Rules

Rule 1: Student Email Domain Validation

* ****Object:**** `Student\_\_c`[cite: 1]

* ****Rule Name:**** `Student\_Email\_Domain\_Validation`[cite: 1]

* ****Formula:****

``excel

NOT(CONTAINS(Email__c, "@student.edu"))

``[cite: 1]

* ****Error Message:**** "Email must be a valid student institutional email."[cite: 1]

* ****Error Location:**** Field: `Email\_\_c`[cite: 1]

Rule 2: Tuition Fee Payment Verification

* ****Object:**** `Enrollment\_\_c`[cite: 1]

* ****Rule Name:**** `Fees\_Must\_Be\_Paid\_Before\_Approval`[cite: 1]

* ****Formula:****

``excel

```
AND(  
    ISPICKVAL(Enrollment_Status__c, "Approved"),  
    Fees_Paid__c = FALSE  
)  
``[cite: 1]
```

* **Error Message:** "Fees must be paid before approving an enrollment."[cite: 1]

* **Error Location:** Top of Page[cite: 1]

Milestone 6: Approval Process Workflow

* **Process Name:** `Approval\_Enrollment\_Request`[cite: 1]

* **Target Object:** `Enrollment\_\_c`[cite: 1]

* **Entry Criteria:** `Enrollment\_Status\_\_c EQUALS "Requested"`[cite: 1]

* **Approver Routing:** Assigned to designated Training Manager[cite: 1].

* **Final Approval Action:** Field Update setting `Enrollment\_Status\_\_c` to `Approved`[cite: 1].

* **Final Rejection Actions:**

1. Field Update setting `Enrollment\_Status\_\_c` to `Rejected`[cite: 1].
2. Send Email Alert notifying the student of rejection[cite: 1].

Milestone 7: Navigation & Tab Management

* Provision Custom Object Tabs for `Students`, `Courses`, `Instructors`, and `Enrollments`[cite: 1].

* Assign distinct visual Tab Icons and configure profile visibility[cite: 1].

Milestone 8: Lightning Application Assembly

* **Application Name:** `Student Enrollment & Course Management`[cite: 1]

* **Navigation Style:** Standard Navigation[cite: 1]

* **Included Tabs:** `Home`, `Students`, `Courses`, `Instructors`,
`Enrollments`, `Tasks`, `Reports`, `Dashboards`[cite: 1]

* **Profile Assignment:** Assigned to `System Administrator`, `Enrollment Officer`, and `Instructor` profiles[cite: 1].

Milestone 9: Page Layouts, Record Types & Related Lists

Record Types on `Enrollment\_\_c`

1. **New Enrollment:** Used for initial course applications[cite: 1].
2. **Re-Enrollment:** Used for retakes and secondary registrations[cite: 1].

Page Layout Assignments

* Assign `New Enrollment Layout` to `New Enrollment` Record Type[cite: 1].

* Assign `Re-Enrollment Layout` to `Re-Enrollment` Record Type[cite: 1].

* Add `Enrollments` Related List to parent `Student\_\_c`, `Course\_\_c`, and
`Instructor\_\_c` main page layouts[cite: 1].

Milestone 10: Process Automation with Salesforce Flows

Flow 1: Auto-Populate Enrollment Date

- * **Type:** Record-Triggered Flow (Before-Save)[cite: 1]
- * **Trigger:** Creation of `Enrollment\_\_c` record[cite: 1].
- * **Action:** Set `Enrollment\_Date\_\_c` = `\$Flow.CurrentDate`[cite: 1].

Flow 2: Approval Actions & Student Activation

- * **Type:** Record-Triggered Flow (After-Save)[cite: 1]
- * **Trigger Update:** `Enrollment\_Status\_\_c` updated to `Approved`[cite: 1].
- * **Actions:**
 1. Trigger automated email confirmation to the student[cite: 1].
 2. Update related `Student\_\_c.Student\_Status\_\_c` to `Active`[cite: 1].

Flow 3: Dynamic Instructor Allocation

- * **Type:** Record-Triggered Flow[cite: 1]
- * **Logic:** Evaluates `Course\_\_c.Category\_\_c`:
 - * If `Technical` —> Auto-assign **Instructor A** (`INSTR\_A`)[cite: 1].
 - * If `Language` —> Auto-assign **Instructor B** (`INSTR\_B`)[cite: 1].
 - * If `Non-Technical` —> Auto-assign **Instructor C** (`INSTR\_C`)[cite: 1].

Flow 4: Automated Admin Task Creation

- * **Type:** Record-Triggered Flow[cite: 1]
- * **Trigger:** `Enrollment\_\_c` created in `Requested` status[cite: 1].

* **Action:** Generate a `Task` record assigned to System Admin with `Due Date = TODAY() + 2` to review pending application[cite: 1].

Milestone 11: Analytics & Reports

1. **Students by Status:** Matrix/Summary report grouping student counts by `Student\_Status\_\_c`[cite: 1].
2. **Enrollments by Course:** Summary report grouping total enrollments per `Course\_\_c` record[cite: 1].
3. **Pending Enrollment Approvals:** Filtered report displaying all records in `Enrollment\_Status\_\_c = "Requested"` status[cite: 1].
4. **Revenue Report (Fees Paid):** Summarized report aggregating `Course\_Fee\_\_c` where `Fees\_Paid\_\_c = TRUE`[cite: 1].

Milestone 12: Executive Dashboards

Assembly of the **Student Management Dashboard** containing:

- * **Donut Chart:** Visualizing student distribution via *Students by Status Report*[cite: 1].
- * **Bar Chart:** Visualizing course volume via *Enrollments by Course Report*[cite: 1].
- * **Gauge Chart:** Displaying cumulative revenue targets via *Revenue Report*[cite: 1].
- * **Data Table:** Displaying action items via *Pending Enrollment Approvals Report*[cite: 1].

Milestone 13: Platform Security & Governance

1. ****Profiles:****

- * `Admin Profile`: Full System Access[cite: 1].
- * `Enrollment Officer Profile`: Create/Read/Edit access on `Student\_\_c` and `Enrollment\_\_c`[cite: 1].
- * `Instructor Profile`: Read-Only access on assigned `Enrollment\_\_c` records[cite: 1].

2. ****Organization-Wide Defaults (OWD):****

- * `Student\_\_c`: Public Read/Write[cite: 1]
- * `Course\_\_c`: Public Read/Write[cite: 1]
- * `Enrollment\_\_c`: Private[cite: 1]

7. TESTING & QUALITY ASSURANCE

System testing was conducted across key operational scenarios:

- * ****Data Integrity Checks:**** Verified that invalid student email domains trigger appropriate UI error messages[cite: 1].
- * ****Validation Enforcement:**** Confirmed that un-paid enrollment approval attempts are blocked by validation rules[cite: 1].
- * ****Flow & Approval Execution:**** Verified automated instructor assignment, status updates, task generation, and automated student email alerts[cite: 1].
- * ****Analytics Accuracy:**** Validated report aggregations and dashboard gauge values against committed database records[cite: 1].

8. SYSTEM ADVANTAGES & DISADVANTAGES

Key Advantages

- * **Centralized System of Record:** Replaces fragmented spreadsheets with standard cloud database architecture[cite: 1].
- * **Reduced Manual Overhead:** Automated flows handle routing, notifications, dates, and assignments[cite: 1].
- * **Real-time Executive Visibility:** Live dashboards provide immediate insight into revenue and application volumes[cite: 1].

Operational Considerations

- * **Platform Dependency:** Fully reliant on Salesforce ecosystem infrastructure[cite: 1].
- * **Initial Setup Configuration:** Requires upfront effort to configure fields, security models, and flow automation rules[cite: 1].

9. CONCLUSION

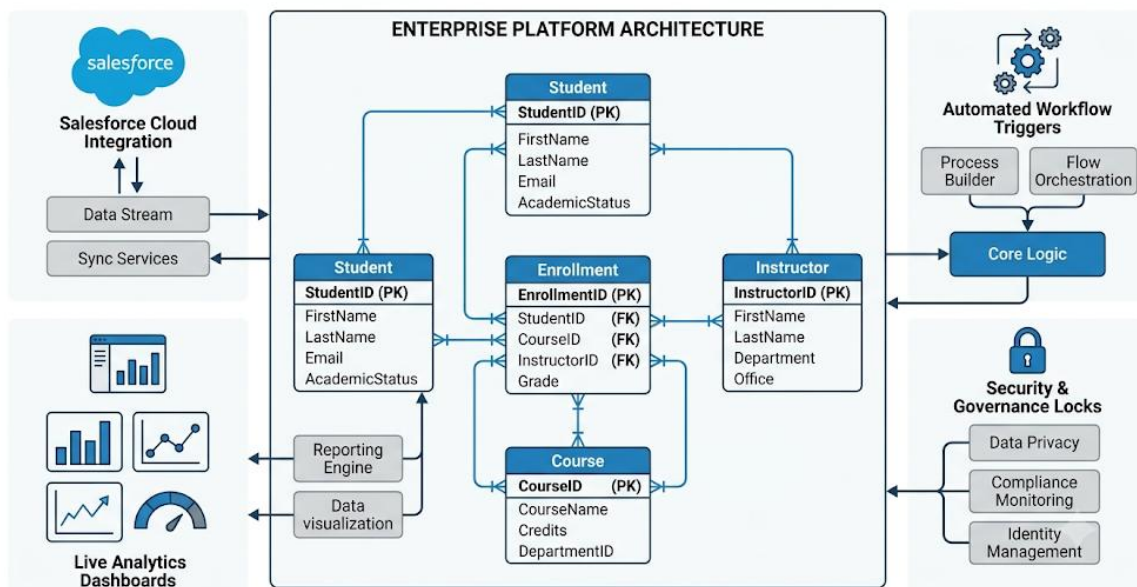

The Student Enrollment & Course Management System (SECMS) successfully transforms manual academic operations into an automated, transparent, and scalable Salesforce application[cite: 1]. By replacing disconnected spreadsheets with native cloud objects, automated flows, validation rules, and live reporting dashboards, SECMS ensures high data accuracy, operational speed, and executive control throughout the student lifecycle[cite: 1].

10. FUTURE ENHANCEMENTS

- * Direct Integration with Payment Gateways for online fee processing[cite: 1].
- * Experience Cloud Student Portal for self-service registration and status tracking[cite: 1].
- * Salesforce Mobile App configuration for remote faculty access[cite: 1].
- * AI-driven predictive analytics for enrollment projections[cite: 1].

11. APPENDIX

- * **Source Code:** Salesforce Declarative Metadata & Flow Definitions[cite: 1]
- * **Dataset Schema:** Custom Salesforce Objects & Field Mapping[cite: 1]
- * **Deployment Org:** Salesforce Developer Org[cite: 1]

THANK YOU
